Sergio Montero Díaz

Site Reliability Engineer | Kubernetes · GitOps · Observability · Security

Málaga, Spain | sergio@smdspace.es | smdspace.es | linkedin.com/in/sergiomonterodiaz

PROFESSIONAL SUMMARY

Site Reliability Engineer with experience in Kubernetes, Helm and GitOps for deployment automation, and in observability tools (Prometheus, Grafana, Loki) for diagnosing and resolving incidents in complex systems.

My background combines systems administration and cybersecurity with a progressive focus on cloud-native infrastructure, working across both on-premise environments and container orchestration technologies.

Interested in continuous learning and sharing knowledge with other professionals in the field.

EXPERIENCE

Jr. Site Reliability Engineer

Tupl Inc. · *Oct 2026 – Present* · *Málaga, Andalucía, Spain*

- Ensuring the reliability and availability of production platforms on Kubernetes, with GitOps (Flux) and Helm for consistent, automated delivery.
- Owning observability and alerting (Prometheus, Grafana, Loki, Alertmanager) to detect, diagnose and resolve incidents, and documenting root causes.
- Security point of contact within the SRE team: vulnerability remediation, image and deployment reviews, and security initiatives alongside the security leadership.

Jr. Infrastructure & Operations Engineer

Tupl Inc. · *Mar 2025 – Oct 2026* · *Málaga, Andalucía, Spain*

- Deploying and managing Kubernetes clusters, using Helm for package management and GitOps (Flux) to automate and standardize the application lifecycle.
- Maintaining the observability stack (Prometheus, Grafana, Loki, Alertmanager) for proactive monitoring, log centralization, and incident diagnosis across the platform.
- Contributing to continuous platform improvement, identifying and resolving operational bottlenecks.
- Conducting security reviews of images and deployments, applying patches and remediations for detected vulnerabilities.
- Resolving production incidents, collaborating with the team to minimize impact and document root causes.

System Administrator

Data Control Tecnologías de la Información, S.A. · *Apr 2024 – Jun 2024* · *Málaga, Spain · Remote*

- Supported the administration and maintenance of systems and servers, assisting with configuration tasks and incident resolution.
- Installed and managed EDR (Endpoint Detection and Response) solutions on client systems.
- Supported network infrastructure and operating systems management in a remote work environment.

IT Technician

BIASSION SL · *Jan 2021 – Apr 2021* · *Málaga, Andalucía, Spain*

- Preventive equipment maintenance and technical analysis to anticipate and prevent issues.
- Configuration and administration of virtualized environments.
- Network device configuration.
- Setup and configuration of monitoring systems.
- Backup configuration and management.
- Remote and on-site technical support for clients.
- Resolved technical support incidents, diagnosing and troubleshooting hardware and software issues.

PROJECTS

DimOS

Hardened Linux distribution · Personal project · v0.11

Built from scratch and cross-compiled against musl for x86_64 and arm64, with s6 as init, its own Ed25519-signed package manager, LUKS2 by default, default-deny nftables, AppArmor and auditd, optional Secure Boot and a signed, byte-for-byte reproducible ISO.

Atlas

Local AI assistant · Personal project

Personal assistant that runs entirely on my own hardware (Python, Ollama, 7B model), with 50 tools, voice interaction and Telegram. Anything that must be exact is computed by code, not the model. 487 tests, 97% coverage.

EDUCATION

Universitat Oberta de Catalunya (UOC)

Bachelor of Science in Computer Science · *Sep 2025 – Present*

Cesur

Higher Vocational Training, Network Systems Administration · *Jan 2022 – Feb 2024*

Grade: 9 / 10

Escuela de Organización Industrial (EOI)

Cybersecurity and Ethical Hacking Specialist — Information and Systems Security · *Jun 2021 – Nov 2021*

iFP. Innovación en Formación Profesional

Vocational Training, Microcomputer Systems and Networks · *2019 – 2021*

Grade: 8.50 / 10

LICENSES & CERTIFICATIONS

Aptis Level 2 Certificate ESOL International C1 — British Council, Jun 2025

Ultimate AWS Certified Solutions Architect Associate 2025 — Udemy, Jan 2025

Applied Digital Forensics — Universidad de Málaga, Dec 2024

Learn Bash Scripting Course — Codecademy, May 2025

Learn Git & GitHub Course — Codecademy, May 2025

Learn Java Course — Codecademy, May 2025

MSP Level III - Co-MXDR — TrendAI, May 2024

MSP Level II - XDR — TrendAI, May 2024

MSP Level I - Sales Training — TrendAI, May 2024

DEHO 103 - Pentesting — Deloitte, Jul 2020

Cambridge English: Preliminary (PET) — University of Cambridge, Jul 2019

SKILLS

Cloud-native & Orchestration: Kubernetes, Helm, GitOps (Flux), Docker

Observability: Prometheus, Grafana, Loki, Alertmanager

Systems & Networking: Linux, Systems Administration, Virtualization, Network Operations

Security: Cybersecurity, Penetration Testing, EDR, Digital Forensics

Cloud: Amazon Web Services (AWS)

Development & Tools: Git, GitHub, Bash, Java, C++
